

RAZRED IN PREDMET		
7. RAZRED		
MATEMATIKA 	<p>Utrjevanje snovi</p> <p>Koti v štirikotniku; trapezi in lastnosti trapezov</p>	<p>Najprej ponovi učno snov preteklega tedna.</p> <p>Nato sledi navodilom učiteljice. Spoznal boš novo snov. Lahko si pomagaš s povzetkom, ki ga prilepiš v zvezek.</p>
SLOVENŠČINA 	<p>Stavčni členi</p>	<p>Ponovi stavčne člene in njihove vprašalnice preko tabele, ki vam jo je posredovala učiteljica pred dvema tednoma.</p> <p>V tem tednu boste podrobneje spoznali še prislovna določila (kraja, vzroka, časa, načina) in predmet. Sledi navodilom učiteljice in reši naloge. Če boš imel težave, kontaktiraj učiteljico SLJ ali učiteljico DSP.</p> <p>Ne pozabi – vedno se najprej vprašaj po povedku!</p>
ANGLEŠČINA 	<p>7. a: First Americans</p> <p>7. b: Pretest, Comparing with as ... as</p>	<p>Preglej povzetek in ga prilepi v zvezek – lažje se boš prebil čez besedilo.</p> <p>Ta teden te čaka preverjanje znanja. Najprej ponovi snov po zvezku, nato se samostojno loti reševanja nalog na preverjanju znanja. Preko ZOOM-a boste z učiteljico preverili rešitve.</p> <p>Povzetek nove snovi pa najdeš v prilogi.</p>

KOTI V ŠTIRIKOTNIKU

Kote v štirikotniku najlaže določimo tako, da 4-kotnik razdelimo na dva trikotnika. Vemo, da je vsota notranjih kotov v trikotniku 180° .

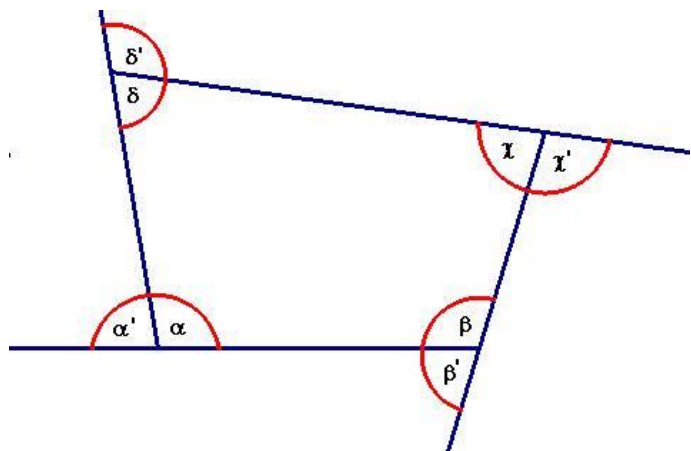

$$\triangle ABC: \alpha_1 + \beta + \gamma_1 = 180^\circ$$

$$\triangle ACD: \alpha_2 + \delta + \gamma_2 = 180^\circ$$

$$\alpha + \beta + \gamma + \delta = 360^\circ$$

V vsakem oglišču je vsota notranjega in zunanjega kota 180° (sokota).

$$\alpha + \alpha' = 180^\circ$$

$$\beta + \beta' = 180^\circ$$

$$\gamma + \gamma' = 180^\circ$$

$$\delta + \delta' = 180^\circ$$

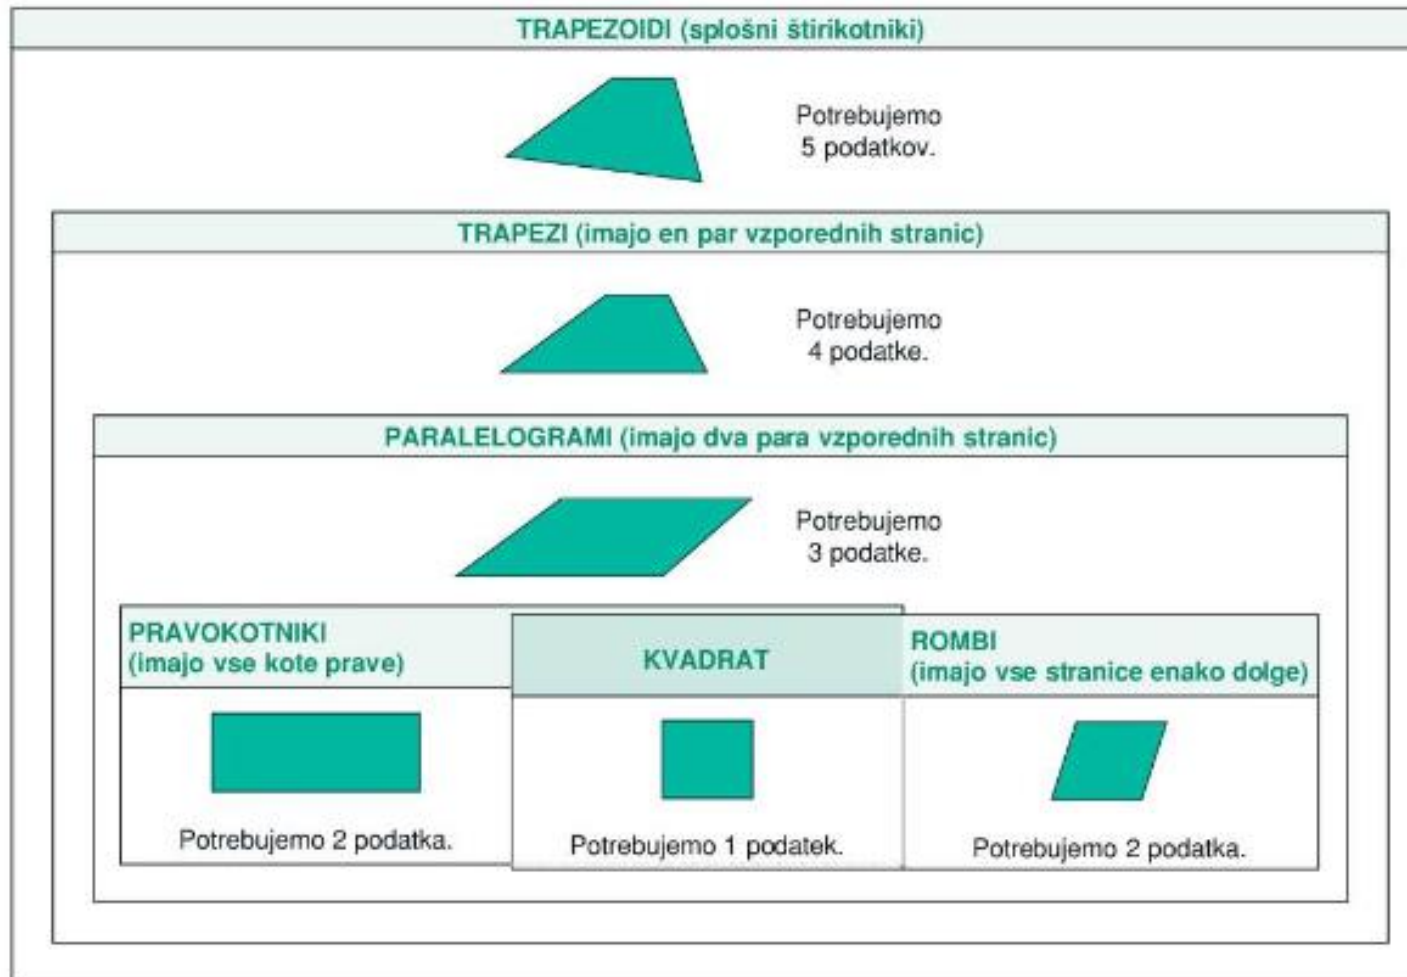

$$\alpha + \beta + \gamma + \delta = 360^\circ$$

VSOTA KOTOV

-notranji koti: $\alpha + \beta + \gamma + \delta = 360^\circ$

-zunanji koti: $\alpha' + \beta' + \gamma' + \delta' = 360^\circ$

Vrste trapezov

THE FIRST AMERICANS (7. a)

NEW WORDS – nove besede

Alaska – Aljaska

The Inuits – Inuiti / Eskimi

a fisherman – ribič (množina fishermen)

a hunter - lovec

a farmer – kmet

Christopher Columbus – Krištof Kolumb

Indians – Indijanci

Native Americans – staroselci (prvotni prebivalci Amerike)

a tribe - pleme

sign language – znakovni jezik

an immigrant - priseljensec

a settler – naseljensec

a neighbour – sosed

land – zemlja

war – vojna

a leader – vodja

an illness – bolezen

a government – vlada

a reservation – rezervat (območje, kjer živijo danes Indijanci)

to force – prisiliti

an ancient tradition – stare tradicije (navade)

1. From Asia to Alaska

First Americans travelled across the ice from Asia to Alaska. Some of them stayed in Alaska (Inuits).

2. Canadian and American Indians

Indians who didn't stay in Alaska, went to Canada, North and South America.

5. Native Americans today

They live on reservations.
They try to keep their ancient tradition.

The first Americans

4. Europeans came

- Europeans wanted their land. There were many wars.
- They brought illnesses. A lot of Indians died.

3. The way of life

- They were farmers, fishermen, hunters.
- They lived in tribes.
- They had sign language.

IT'S A PARADISE (RICHIE SOWA) – 7. B

NEW WORDS

An island - otok

Solar power - sončna energija

A cooker - štedilnik

To share - deliti

Ducks - race

Paradise - raj

He built his own island near Cancun in Mexico from 250 000 plastic bottles.

His house has got a living room, two bedrooms, simple kitchen and also small bathroom.

He uses solar power. He has got solar cooker, electric lights, a CD player and a shower.

He lives with his dog, two ducks and four cats.

A lot of tourists come to see his island.

He believes he lives in a paradise.

COMPARING WITH AS ... AS (primerjaj dve lastnosti tako, da uporabiš besedi as ... as)

ČE PRIMERJAŠ DVE ENAKI STVARI ...

Our life is **as exciting as** Richie's. (Naše življenje je tako zanimivo kot Richiejevo.)

Kangaroos are **as fast as** giraffes. (Kenguruji so tako hitri kot žirafe.)

ČE PRIMERJAŠ DVE RAZLIČNI STVARI

Our house isn't **as nice as** Richie's. (Naša hiša ni tako lepa kot Richiejeva.)

Students aren't **as happy as** babies. (Učenci niso tako srečni kot dojenčki.)

Kadar primerjamo dve stvari, uporabimo AS + PRIDEVNIK + AS.
